

COPD Fact Sheet

COPD is the

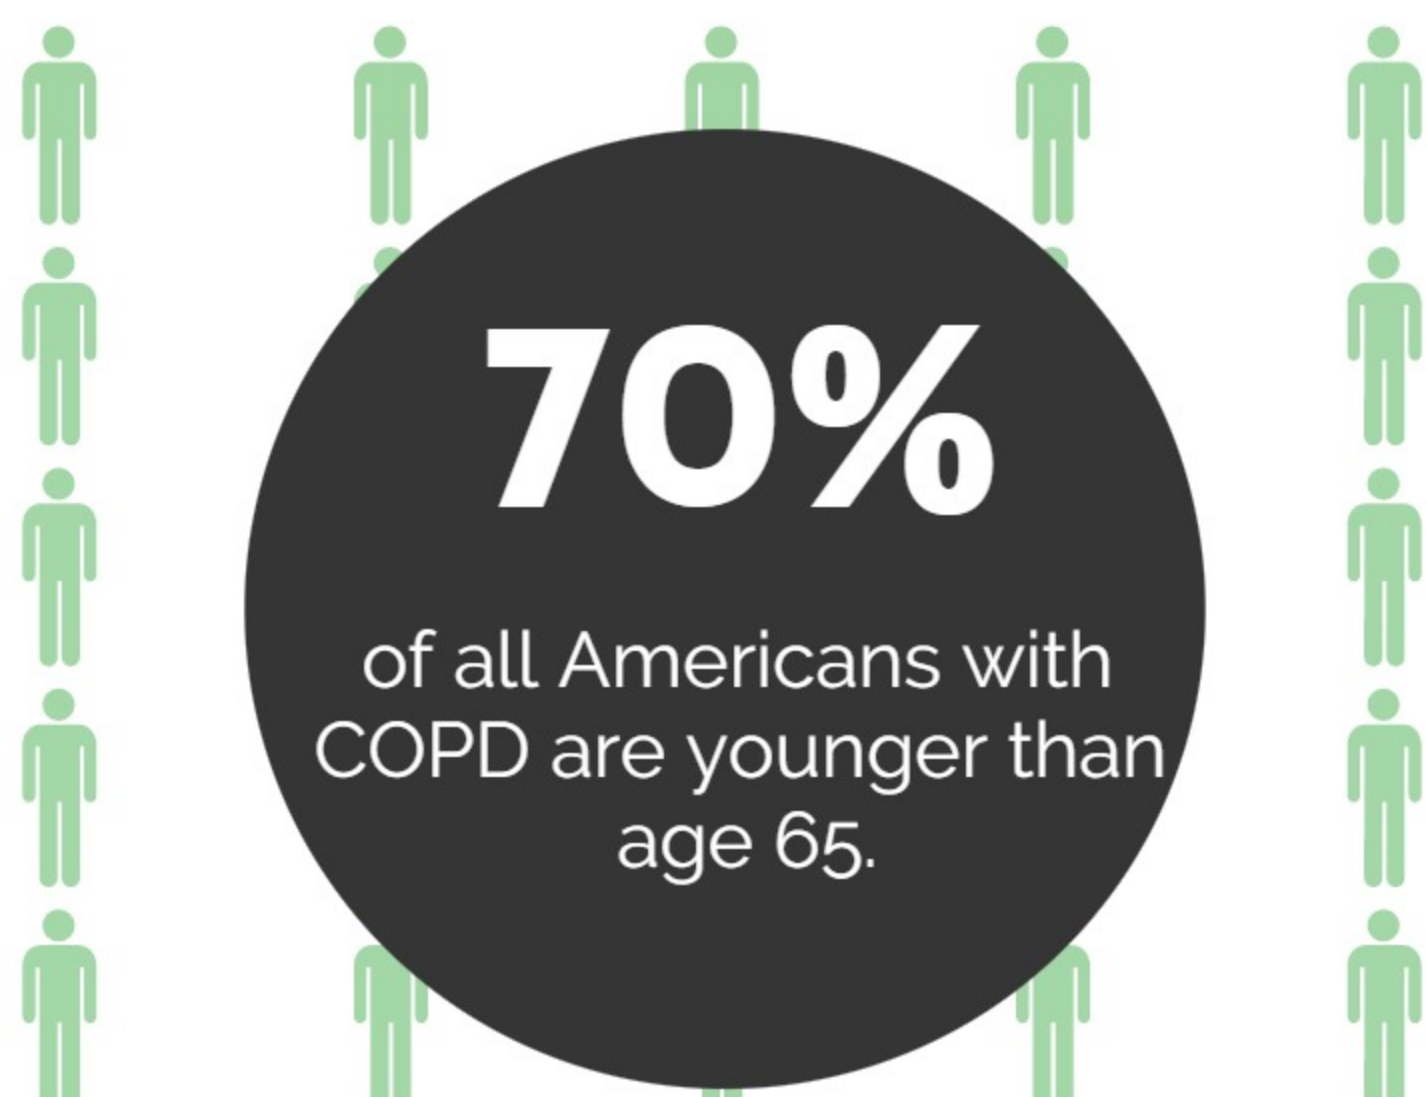

3rd

leading cause
of disease in
the U.S.

15 million

Americans have been
diagnosed with COPD with
an estimated 12 million
more undiagnosed.

70%

of all Americans with
COPD are younger than
age 65.

Women are more likely
to report having COPD
than men.

People with COPD are more likely to...

develop pneumonia
because it is difficult
to clear lungs.

have limited activity
because of their
disease.

to feel that cost
inhibits receiving
health care.
